PAPER CRAFT / AGES 4-7

My Tiny Paper Museum

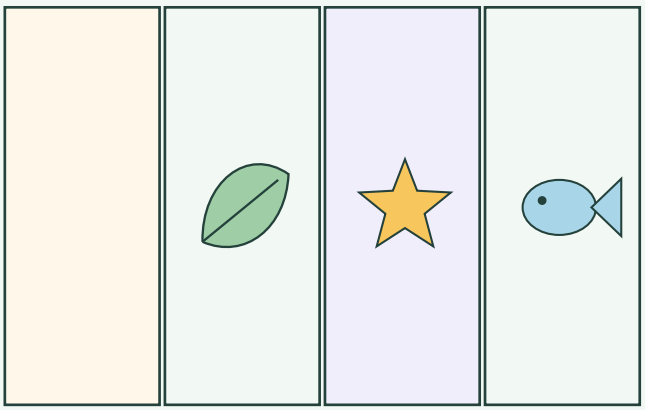
Fold a four-panel museum for three small paper exhibits.

YOU WILL NEED

Crayons, child-safe scissors and a glue stick.

1. Decorate the cover and empty display frames.
2. Cut the museum strip and three picture pieces.
3. Fold the strip back and forth at the three dashed lines.
4. Glue one picture inside each display frame. Add a label and give a museum tour.

ONE WAY TO MAKE IT



Adult supervision: child-safe scissors, glue stick, and paper only. Keep small pieces out of mouths.

My Tiny Paper Museum

Print at 100% on A4, or fit to Letter. Colour first. Cut the thick outside edges.

Dashed lines: fold. Thin inner lines: decorate. You can draw your own exhibits instead of using the three supplied pictures.
