PAPER CRAFT / AGES 4-7

Rainbow Paper Ladder

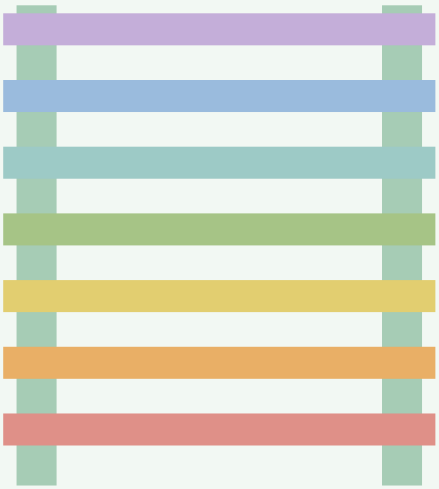

Join seven coloured rungs to two long side rails.

YOU WILL NEED

Crayons, child-safe scissors and a glue stick.

1. Colour the seven short strips in your own rainbow palette.
2. Cut out two long rails and seven short rungs.
3. Lay the rails side by side. Glue each rung across both rails.
4. Let the glue dry flat. Count the seven rungs.

ONE WAY TO MAKE IT

Adult supervision: child-safe scissors, glue stick, and paper only. Keep small pieces out of mouths.

Rainbow Paper Ladder

Print at 100% on A4, or fit to Letter. Colour first. Cut the thick outside edges.

Dashed lines: fold. Thin inner lines: decorate. This is a paper picture. Never climb on it or use it as a real ladder.
