PAPER CRAFT / AGES 4-7

Underwater Picture Frame

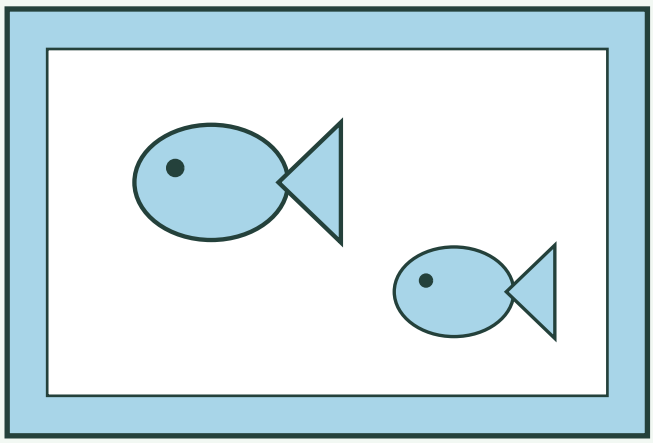

Build a frame from four bars and add fish.

YOU WILL NEED

Spare paper, crayons, child-safe scissors and a glue stick.

1. Colour and cut out two long bars, two short bars and two fish.
2. Glue the bars onto spare paper to make a rectangle. Let the corners overlap.
3. Glue the fish inside your frame.
4. Draw bubbles, sea plants and a sandy seabed.

ONE WAY TO MAKE IT

Adult supervision: child-safe scissors, glue stick, and paper only. Keep small pieces out of mouths.

Underwater Picture Frame

Print at 100% on A4, or fit to Letter. Colour first. Cut the thick outside edges.

Dashed lines: fold. Thin inner lines: decorate. There is no inside hole to cut. The four separate bars make the frame.
